**HARCOURT ASSESSMENT OFFERS WEB LINK TO JOURNALS
FROM ELSEVIER'S ScienceDirect®**

SAN ANTONIO – Harcourt Assessment, Inc., the nation's leading test publisher, now offers easy access through its Web site to journals from Elsevier's ScienceDirect®, the world's leading resource for scientific, technical and medical information.

Harcourt and Elsevier are both members of Reed Elsevier Group plc, a worldwide publisher and information provider operating in the science and medical, legal, education and business-to-business industry sectors.

Visitors to HarcourtAssessment.com/ScienceDirect will be linked to peer-reviewed research related to assessments published under Harcourt's PsychCorp™ brand. Journals currently featured on the site include the Archives of Clinical Neuropsychology; Clinical Psychology Review; Intelligence; Infant Behavior and Development; and the Journal of School Psychology.

Articles appearing on the Harcourt site are available free of charge. Visitors can also link to ScienceDirect.com, where additional cutting edge research papers are available for purchase.

"This is one more way that Harcourt Assessment can offer value-added solutions to our customers," said Gail Ribalta, vice president of marketing. "Our sister company publishes the kind of research papers that our clinical customers find valuable. It makes good sense to link the two."

Under its PsychCorp brand, Harcourt Assessment publishes a wide variety of clinical products, such as the Wechsler® family of tests, including the Wechsler Intelligence Scale for Children® (WISC-IV®) and the Wechsler Preschool and Primary Scale of Intelligence™. Its educational products include the Stanford Achievement Test series and the Otis-Lennon School Ability Test®.
